

Fund update

For the quarter ended 31 December 2016

NZ Funds KiwiSaver Scheme Income Strategy

This fund update was first made publicly available on 13 February 2017

What is the purpose of this update ?

This document tells you how the Income Strategy has performed and what fees were charged. The document will help you to compare the fund with other funds. New Zealand Funds Management Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The objective of the Income Strategy is to provide exposure to income-orientated assets using an active investment management approach. The anticipated primary investments of the fund are international fixed interest.

Total value of the fund	\$17,378,107
Number of investors in the fund	6,909
The date the fund started	1 November 2010

What are the risks of investing?

Risk indicator for the Income Strategy:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.nzfunds.co.nz/AdviceSolutions/RiskProfile/

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

The risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five years to 31 December 2016. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

How has the fund performed?

	Average over past 5 years	Past year
Annual return (after deductions for charges and tax)	3.22%	4.09%
Annual return (after deductions for charges but before tax)	4.49%	5.94%
Market index annual return (reflects no deduction for charges and tax)	4.95%	4.99%

The market index annual return is based on a composite index calculated using the market indices and weightings set out in the Statement of Investment Policy and Objectives (SIPO). Additional information about the market index is available on the offer register at www.companiesoffice.govt.nz/disclose.

Annual return graph¹

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 31 December 2016.

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Income Strategy are charged fund charges. In the year to 31 March 2016 these were:

	% of net asset value
Total fund charges	1.18%
Which are made up of:	
Total management and administration charges	1.18%
Including:	
Manager's basic fee	0.95%
Other management and administration charges*	0.23% (estimate) ²
Total performance-based fees	0.00%
Other charges	\$ amount per investor
Administration fee ³	\$36

*Note: Included within 'Other management and administration charges' are performance-based fees charged by external managers of underlying funds that the fund invests into which totalled 0.04%. Performance-based fees are subject to market movements and external manager performance and the amount of these fees for any given period may materially differ from those disclosed for the year to 31 March 2016.

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS for the NZ Funds KiwiSaver Scheme for more information about those fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

Liam had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Liam received a return after fund charges were deducted of \$409 (that's 4.09% of his initial \$10,000). Liam also paid \$36 in other charges. This gives Liam a total return after tax of \$373 for the year.

What does the fund invest in?

This shows the types of assets that the fund invests in.

Actual investment mix⁴

Target investment mix⁵

Cash and cash equivalents	3%
New Zealand fixed interest	19%
International fixed interest	78%
Other*	0%

*'Other' includes foreign currency.

Mark Brooks	Head of Income and a Principal	9 years 1 month	Senior Portfolio Manager, Credaris	3 years 4 months

Further information

You can also obtain this information, the PDS for the NZ Funds KiwiSaver Scheme, and some additional information from the offer register at www.companiesoffice.govt.nz/disclose/.

Notes

1. The bar graph shows fund returns after the deduction of fees and tax; however, the market index returns are shown before any fees or tax are deducted.
2. Other management and administration charges comprise:
 - (a) operating costs directly incurred by the fund; and
 - (b) annual management fees, performance-based fees and operating costs incurred by underlying funds the fund invests into.

Estimates were used when deriving annual management fees, performance-based fees and operating costs incurred by the following underlying funds the fund invests into.

Fund	Information and assumptions used to make estimates
-------------	---

Civic Capital Currency Offshore	Fee and operating cost amount and performance-based fee amount are estimated using the same performance criteria as that is used by the administrator of Civic Capital Currency Offshore.
Nordea 1 - US Total Return Bond Fund	Fee and operating cost information obtained from the administrator of the Nordea 1 - US Total Return Bond Fund was for the year to 31 December 2015.

3. The NZ Funds KiwiSaver Scheme has an administration fee of \$3.00 per investor per month.
4. NZ Funds uses derivatives as part of its active investment management approach. The use of derivatives can result in the total economic exposure of the fund exceeding 100% which means the fund is leveraged. Where economic exposure exceeds 100%, the actual investment mix pie graph and the target investment mix table have been scaled to 100%. Without scaling, the total economic exposure of the fund, as shown in the actual investment mix and the target investment mix, would be 101.10% and 103.00% respectively. For more information on economic exposure, see the NZ Funds Kiwisaver Scheme 'Other Material Information' document on the offer register at www.companiesoffice.govt.nz/disclose/.
5. The fund is able to invest in a wide range of assets and does not have a target investment mix. For the purposes of this update, the target investment mix has been compiled using the actual investment mix. NZ Funds is an active investment manager and as a result the actual investment mix and target investment mix will change in the future and changes may be material.
6. The top 10 investments have been compiled using a balance sheet approach. This differs from the approach used in compiling the actual and target investment mixes, which include the impact of derivatives.
