

## Example of how this applies to an investor

Liam had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Liam received a return after fund charges were deducted of \$277 (that's 2.77%<sup>4</sup> of his initial \$10,000). Liam also paid \$36 in other charges. This gives Liam a total return after tax of \$241 for the year.

## Further information

---

You can also obtain this information, the PDS for NZ Funds WealthBuilder, and some additional information from the offer register at [www.companiesoffice.govt.nz/disclose/](http://www.companiesoffice.govt.nz/disclose/).

## Notes

---

- 1 As the fund started on 27 February 2020, actual returns for the last five years are not available. To calculate the risk indicator, a combination of actual returns and market index returns have been used. Market index returns were used for the period prior to 27 February 2020. As a result, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund.
- 2 As the fund started on 27 February 2020, historical fee information for the most recent scheme year is not available. The total fund charges shown are based on fee information in the PDS dated 9 June 2020. It includes our best estimate of the fees and costs that will be charged to the fund including fees and costs payable in respect of the underlying funds in which the fund invests (including performance fees). For more information on the basis of estimates, see the PDS and the NZ Funds WealthBuilder 'Other Material Information' document on the offer register at [www.companiesoffice.govt.nz/disclose/](http://www.companiesoffice.govt.nz/disclose/).
- 3 For investors aged 18 or over, NZ Funds charges an administration fee of \$3 per month.
- 4 As the fund started on 27 February 2020, this calculation is based on the market index return for the past year.
- 5 NZ Funds uses derivatives as part of its active management approach. The use of derivatives can result in the total economic exposure of the fund exceeding 100% which means the fund is leveraged. Where economic exposure exceeds 100%, the actual investment mix pie graph has been scaled to 100%. Without scaling, the total economic exposure of the fund, as shown in the actual investment mix would be 181.87%. For more information on economic exposure, see the Other Material Information document on the offer register at [www.companiesoffice.govt.nz/disclose/](http://www.companiesoffice.govt.nz/disclose/).
- 6 Targets indicate what is expected to apply over the course of an economic cycle and should be considered as general guidance only. NZ Funds is an active manager and may use investment strategies that differ materially from the targets.
- 7 The top 10 investments have been compiled using a balance sheet approach. This differs from the approach used in compiling the actual and target investment mixes, which include the impact of derivatives.
